#### Key points regarding foreign currency fixed deposit

- 1. Though there is no risk of loss of principal in deposited foreign currency, the exchange rate to be used for currency conversion may fluctuate, and that may cause an exchange loss. Therefore, the value of Yen you will receive including interest may be smaller than the amount of Yen you initially deposited, if the deposit currency has depreciated against Yen.
- 2. TTS rate (the rate at which Yen is converted to another currency) and TTB rate (the rate at which a foreign currency is converted to Yen) are applied respectively when Yen is converted to another currency (making deposit) and when a foreign currency is converted to Yen (making withdrawal). TTS rate is determined as follows: the middle rate (the standard rate for foreign currency transactions between a bank and a customer, which fluctuate according to foreign exchange rate move) plus foreign exchange commission. TTB rate is determined as follows: the middle rate minus foreign exchange commission. Foreign exchange commission is one yen for conversion to or from one US dollar.
- 3. As a result, the loss of principal and interest may occur when the Yen does not fall against the foreign currency by a margin that exceeds the foreign exchange commission, not only if the Yen has appreciated against the deposit currency.
- 4. When you deposit / withdraw in the foreign currency cash, handling charge (two yen per one US dollar) will be applied.
- 5. Penalties are charged for early withdrawals of the deposit (Please see the following section on early withdrawal for more details.). Therefore, the amount of the deposit after deduction of penalties may be smaller than the amount of the initial deposit.
  - \* We accept foreign currency deposits only in UD Dollar.
  - \* Commission is subject to change without notice any time.
